Survey Notification Letter

WisDOT Projects 1706-06-00, 5235-03-01, 1706-06-01, 5330-02-03, & 5235-03-00
WIS 80 and WIS 11
Grant County

May 15, 2020

Dear Property Owner,

JT Engineering, Inc. is under contract with the Wisconsin Department of Transportation to develop a series of roadway improvement projects along WIS 80 and WIS 11 between Platteville and the Illinois State Line in Grant County. This letter is being sent to inform you that in the coming weeks survey crews will be on-site collecting pertinent information throughout the corridor as part of the initial stages of the project. A small crew (1-3 people) will be working in the area.

With the suggested COVID-19 social interaction restrictions, please limit any interaction with our survey crews as much as possible, and practice proper social distancing with them should you have questions while they're on site. If you have any questions about the project or the work they will be performing, you may also contact me directly at bradg@jt-engineering.com or (608) 216-8546.

Within the coming year, a notification for a public informational meeting will be sent to you. The purpose of this meeting will be to familiarize property owners in the area with the proposed highway project and gather input.

Currently, project construction is anticipated to proceed in accordance with the dates shown in the enclosed Project Location Map. The scope of the project primarily calls for rehabilitation of the existing roadway with intersection improvements at the WIS 11 / WIS 80 intersection in Hazel Green and the WIS 80 / WIS 81 intersection between Cuba City and Platteville. The project further seeks to replace existing guard rail features in accordance with current standards and to rehabilitate an existing bridge and an existing box culvert near Platteville. Existing curb ramps are also proposed to be replaced in accordance with Americans with Disabilities Act (ADA) guidelines to the greatest degree possible within the scope of this project.

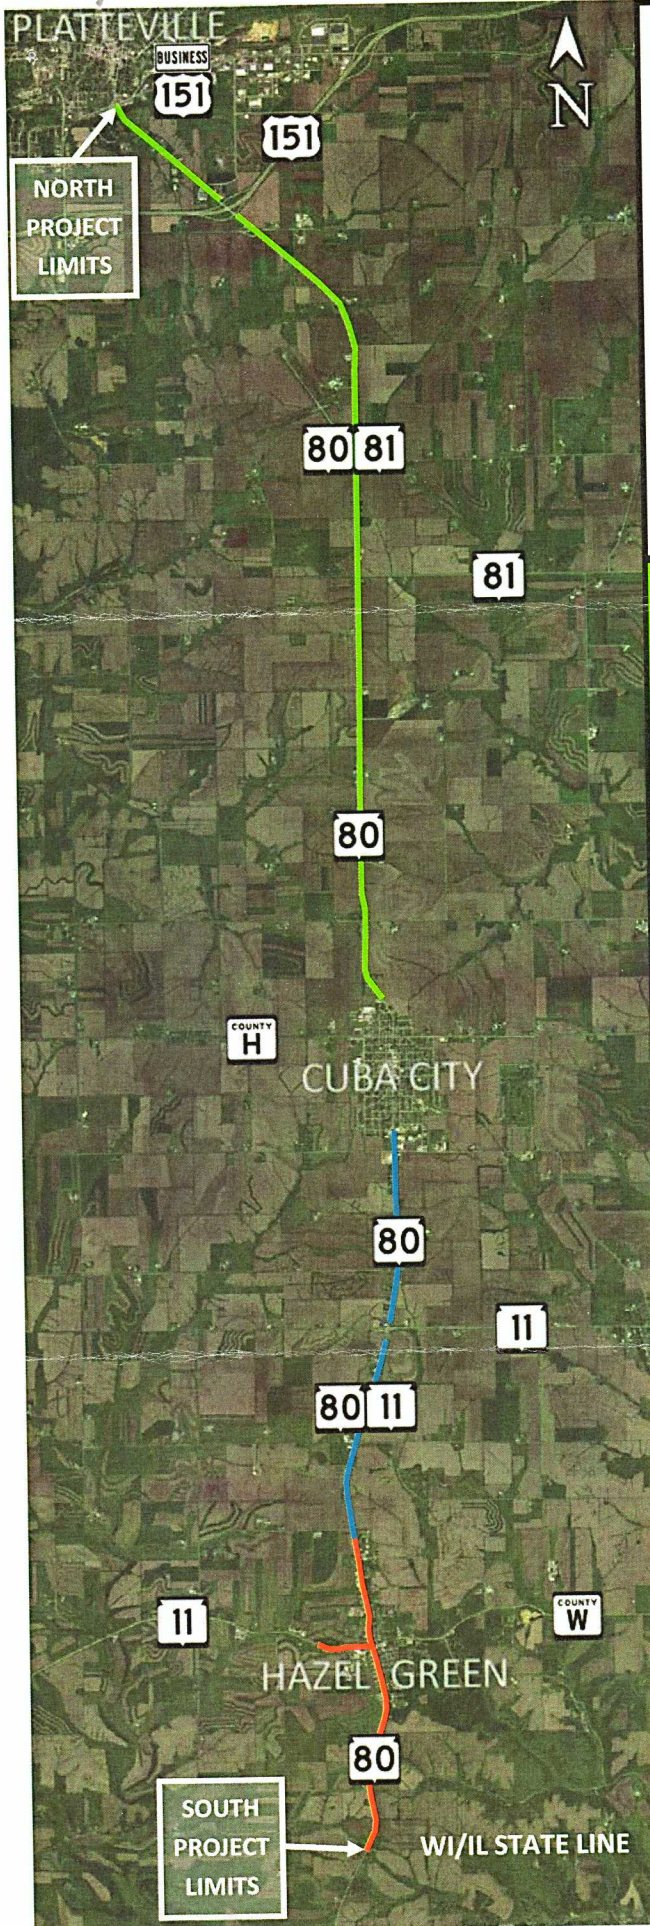

I would like to thank you in advance for your cooperation and assistance in our project development efforts. If you have any questions about this project, please feel free to contact me using the information listed above.

Sincerely,

Brad Groh, PE
